DAIRY & FOOD SANITATION
VOLUME 6

AUTHORS INDEX

A

ADDIS, P.B., cholesterol and cholesterol oxides in dairy products, 464.
ADESIYUN, A.A., bacteriologic studies of foodhandlers, 460.
AJANNUSI, O.J., (see Adesiyun, 460).
AKPA, S.J., (see Adesiyun, 460).
ALVAREZ, R.J., book review, 118, 357, 458, 573.
AMSHEY, J.W., milk contamination with antibiotics as detected by an immunoassay method, 465.
ANDERSON, D., QA in the food industry, 459.
ANDERSON, K., book review, 356, 506, 574.
ARNOLD, E., (see Packard, 332, 430).
ATHERTON, H.V., the 3-A story, 96.

B

BAIGENT, G.J., (see Donnelly, 461).
BARNARD, G.T., (see Bleile, 465).
BARNARD, S.E., president's message, 1, 93; past president's message, 425; total solids composition of regular homogenized milk, 465; presidential address, 516.
BEHRE, L.M., should sulfite food additives be banned, 386.
BENDER, R.C., milk quality premiums, 469.
BENGSCH, H.K., (see Ginn, 376).
BIGALKE, D., dairy quality control, 24, 68.
BIRCHARD, D., dairy equipment cleaning and sanitizing, 470.
BLEILE, D.M., detection of antibiotics in milk by a rapid test strip assay, 465.
BRADLEY, R.L., characteristics and efficiency of milk filters, 141.
BRAZIS, A.R., (see Ginn, 376).
BRIGGS, E.H., (see Donnelly, 461).
BRINDA, J.J., guidelines for facilities planning, 460.
BROOME, C.V., listeriosis in the United States, 463.
BRUHN, C.M., consumer response to food irradiation, 459.
BRUSEWITZ, G.H., book review, 356.
BULLERMAN, L.B., book review, 573; (see Palomar, 461, 469).
BULTHAUS, M.M., (see Ginn, 376).
BURBEE, C.R., food safety issues and their implications for agriculture, 491.
BUSH, R.K., (see Taylor, 460).
BUSSE, W.W., (see Taylor, 460).

C

CASE, R., (see Ginn, 376).
CASSENS, R.G., (see Johnson, 462).
CHEN, J., (see Zall, 285).
CIESIELSKI, C.A., (see Broome, 463).
CLINGMAN, C.D., quality of vacuum packaged fish, 194; managing a crisis successfully, 428.
COLEMAN, W.W., antibiotics in my milk?!, 48, controlling *listeria* hysteria in your plant, 555.
COLLINS-THOMPSON, D., *Salmonella* in Cheddar cheese, 472.
CRESS, D.C., (see Mock, 234).

D

DELIZZA, A.J., (see Bleile, 465).
DEMOTT, B.J., increasing the calcium:sodium ratio in cottage cheese, 465.
DESAUTELS, G.J., (see Barnard, 465).
DESROSIER, J.P., (see Ward, 472).
DONNELLY, C.W., raw milk analysis for *L. monocytogenes*, 461; use of a FA procedure for detection of *L. monocytogenes* in dairy products, 463.
DOYLE, M.P., methods for detecting *L. monocytogenes*, in cheese, 464; (see Johnson, 462).
DYCK, J.E., (see Bleile, 465).

E

EGAMANA, J.A., (see Adesiyun, 460).
EL-GAZZAR, F.E., (see Rusul, 469).
EMERY, H.C., book review, 506; (see Smith, 10; Hall, 280).
ESEN, U.H., safety of airline foods, 461.
EVERSON, T.C., milk quality premiums, 469.

F

FARBER, J.M., ELISA for detecting *L. monocytogenes* in raw milk, 462; (see Johnston, 462).
FELDMAN, J., safety of airline foods, 461.
FIELDS, S.C., (see Zall, 285).
FINNE, G., (see Wyatt, 473).
FIRSTENBERG-EDEN, R., (see Tsang, 468).
FLORES, L.M. (see Palomar, 461).
FLOWERS, R.S., *Salmonella* identification in foods - recent developments, 472.
FUQUA, R.G., UHT milk to monitor calibration of infrared testing equipment, 466; (see Ginn, 376).

G

GABIS, D.A., the Illinois milkborne salmonellosis outbreak, 472.
GALLUP, C.D., (see Bleile, 465).
GILMAN, C.R., (see Ginn, 376).
GINN, R.E., NCIMS informational statements, 376; (see Packard, 332, 430).
GLASS, E.D., (see Barnard, 465).
GORDON, J.C., (see Warner, 4).
GOYAL, S.M., (see Maheshkumar, 467).
GRAMLING, G.E., computer applications in DHIA laboratories, 466.
GRAVANI, R.B., food science facts, 22, 63, 112, 160, 202, 250, 298, 344, 398, 443, 509.
GULDEN, D., (see Packard, 332, 430).

H

HALL, C., SR., plumbing cross connections in food service facilities, 280.
HALPIN, M.I., *S. aureus* in cream with various amounts of milkfat, 466.
HANJAN, S.N., (see Bleile, 465).
HANKIN, L., quality of tomato products, 243.
HARLANDER, S.K., biotechnology in the food industry, 459.
HEADY, J., (see Ginn, 376).
HENRY, C.W., "grasshopper" food protection activities, 51.
HICKEY, P.J., (see Ginn, 376).
HIGHTOWER, A.W., (see Broome, 463).
HOOPER, A.J., (see Clingman, 194).
HSU, W.C., (see Bleile, 465).
HUNTER, A.G, new reproductive biotechnologies affecting the dairy industry, 459.

J

JOHNSON, J., survival of *L. monocytogenes* in ground beef, 462.
JOHNSON, R.M., *S. enteritidis* outbreak in Marquette County, Michigan, 380.
JOHNSTON, M.A., surveillance of cheese for *Listeria*, 462.
JOHNSTON, R., *Salmonella* in cooked beef, 328.

K

KAMALY, K.M., growth of lactic acid bacteria in lactase-treated skim milk , 466.
KASTNER, C.L., processed meat products and safety issues, 186.
KELLEY, W.N., (see Ginn, 376).
KHANNA, P., (see Bleile, 465).
KOENIG, E.K., (see Ginn, 376).
KOZAK, J.J., FDA's dairy program initiatives, 184; FDA's milk dairy initiatives, 467.
KRAMER, C.S., (see Burbee, 491).
KRAMER, M.N., QC intervention of *S. typhimurium* in the shrimp industry, 471.
KROPF, D.H., (see Kastner, 186).

L

LAGRANGE, W.S., book review, 356.
LARSON, C.L., new concepts in food packaging, 460.
LAUER, J.L., (see Vesley, 461).
LAVIGNE, C., (see Zee, 468).
LECOS, C., probing America's worst *Salmonella* outbreak, 136; a closer look at dairy safety, 240; using irradiation to preserve food, 488.
LILLQUIST, R., (see Vesley, 461).
LINNAN, M.J., (see Broome, 463).
LITMAN, D.J., (see Bleile, 465).
LOIT, A., (see Johnston, 462).

M

MAHESHKUMAR, S., use of temperature sensitive gel for concentration of bacteria of milk, 467.
MARTH, E.H., behavior of *L. monocytogenes* in milk and cheese, 464; (see Rosenow, 462; Ryser, 463, 463; Halpin, 466; Kamaly, 466; Rusul, 469; Yousef, 470).
MATTHYS, A., letter to the editor, 110.
MAXCY, R.B., microbial quality of raw milk, 467.
MESSER, J.W., (see Ginn, 376).
MOCK, D.E., pesticides, meat animal production and residues in food, 234.
MOIR, L.M., (see Barnard, 465).

N

NASSOS, G., (see Vander Velde, 473).
NICKELSON, R., II, (see Wyatt, 473).
NIERMAN, P.A., milk quality premiums, 469.

P

PACKARD, V., evaluation of reference test methods used in laboratory control samples, 332; evaluation of components of raw milk, 430.
PALOMAR, L.S., effects of potassium sorbate on a restaurant Mexican hot sauce, 461; mold growth and mycotoxin production in Binagol, 469.
PARK, J.D., letter to the editor, 111.
PAUL, R.J., (see Maxcy, 467).
PEPER, D., book review, 574.
PETERSON, R., (see Maheshkumar, 467).
PFLUG, I.J., failure of low-acid canned food processes, 460.
PHELPS, D.D., (see Barnard, 465).
PURVIS, (see Johnston, 462).

R

ROH, P.A., (see Palomar, 461).
ROSENOW, E.M., growth patterns of *L. monocytogenes* in dairy products, 462.
RUSUL, G., *A. parasiticus* growth in a medium containing KCl or KCl and NaCl, 469.
RYSER, E.T., behavior of *L. monocytogenes* in Cheddar cheese, 463; fate of *L. monocytogenes* in Camembert cheese, 463.

S

SAMOILOFF, L., (see Amshey, 465).
SANDER, B.D., (see Addis, 464).
SANDERS, R.L., preliminary incubation count study, 467.
SANDINE, W.E., genetic manipulation to improve food fermentation, 548.
SAVAIANO, D.A., lactose intolerance and fermented dairy foods, 467.
SCHOENI, J.L., (see Doyle, 464).
SCHUTZ, H.G., (see Bruhn, 459).
SEIBERLING, D.A., assuring integrity of pasteurized product via process piping system design, 470.
SEMERAD, R., USDA dairy plant inspection, 468.
SIMARD, R.E., (see Zee, 468).
SIMPSON, W.J., safety of airline foods, 461.
SMITH, D.E., book review, 573; (see Addis, 464).
SMITH, W., public health concerns of fermented milk products, 10.
SOMMER, R., (see Bruhn, 459).
SPEIRS, J.I., (see Farber, 462).
SPENCER, S.B., designing pipeline systems for cleaning, 471.
SPYKERMAN, J.M., safety of airline foods, 461.
STEARNS, G., microwave-processing on quality of milk, 468.
STEMMLER, J., (see Ward, 472).
STREIFEL, A.J., control of mold and indoor air quality, 470; high quality water system disinfection, 471.

T

TATINI, S.R., new test for predicting shelf-life of fluid milk, 468.
TAYLOR, S.L., sulfites in foods, 460.
THERIAULT, V.S., (see Amshey, 465).
THOMPSON, F.M., groundwater contamination - the Rosemount story, 473.
THOMPSON, W.E., (see Fuqua, 466).
TIRARD-COLLET, P., (see Zee, 468).
TOWNSEND, L., milk industry concerns - a regulatory perspective, 232.
TSANG, N., detection of gram-negative bacteria in cottage cheese, 468.
TWEDT, R.M., thermal resistance characteristics of *L. monocytogenes*, 464.

V

VANDER VELDE, G., technology and direction of the hazardous waste industry, 473.
VARRO, R., (see Bleile, 465).
VASAVADA, P.C., (see Stearns, 468).
VESLEY, D., evaluation of handwashing practices for foodservice personnel, 461.

W

WARD, N.R., rapid test for detection of *Salmonella* in food, 472.
WARNER, R.D., pest management in food products, 4.
WEHR, H.M., vitamin additions to milk - are they really there?, 468; (see Ginn, 376).
WEKELL, M.M., seafood poisoning, 473.

WHALEY, K.W., (see Ginn, 376).
WOOD, D.S., (see Collins-Thompson, 472).
WOODWARD, F.C., (see Johnson, 380).
WYATT, L.E., quality and safety of seafood, 473.

Y

YOUSEF, A.E., quantitation of growth of mold on cheese, 470.

Z

ZALL, R., measuring freshness of UHT milk with an automated time temperature monitoring system, 285.
ZEE, J.A., quality of raw and pasteurized goats' milk, 468.
ZIMMERMAN, A.F., (see Ginn, 376).
ZINDULIS, J., (see Tsang, 468).
ZOTTOLA, E.A., bacterial attachment - it's importance in cleaning and sanitizing, 471; salmonellosis - the problem, 472.

SUBJECT INDEX

Bacterial Quality
of vacuum packaged fish, 194

Biotechnology
in the food industry, 459
reproductive biotechnologies in the dairy industry, 459

Cleaning and Sanitizing
bacterial attachment - it's importance in, 471
dairy equipment, 470
designing pipeline systems for, 471
high quality water system, 471

Dairy Industry
assuring integrity of pasteurization through piping system design, 470
computer applications in DHIA labs, 466
Illinois *salmonella* outbreak report, 136
milk filter efficiency, 141
milk quality premiums, 469
national mastitis council column, 25, 69, 114, 161, 203, 299, 355, 399, 440, 510, 576
quality control, 24, 68
safety, 240

Farm Methods Committee
farm sanitation chemical advisory subcommittee report, 99

Food
facts for the sanitarian, 22, 63, 112, 160, 202, 250, 298, 344, 398, 443, 509
hazards to health, 27, 65, 115, 166, 206, 252, 300, 346, 400, 446, 511, 569

Food Industry
failure of low-acid canning processes, 460
food packaging, 460
genetic manipulation to improve food fermentation, 548
quality assurance, 459
quality of tomato products, 243
should sulfites be banned, 386

Food Protection
consumer response to irradiation, 459
food safety issues and their implications for agriculture, 491
"grasshopper activities," 51
keeping our food safe from animal drugs, 551
sulfites, 460
using irradiation to preserve foods, 488

Food Service
bacteriologic studies of food handlers, 460
effects of potassium sorbate on Mexican hot sauce, 461
evaluation of handwashing practices, 461
guidelines for facilities planning, 460
plumbing cross connections, 280
S. enteritidis outbreak in Michigan, 380
safety of airline foods, 461

IAMFES

affiliate officers, 73, 213, 353, 583
annual meeting abstracts, 459
annual meeting paper synopsis, 165, 212, 257, 305
annual meeting program, 147
book reviews, 118, 356, 458, 506, 573
committee reports, 578
committees and chairpeople, 450
DFS instructions for authors, 581
developing scientist award criteria, 485, 545
JFP abstracts, 34, 77, 123, 174, 215, 263, 316, 365, 411, 480, 540, 591
letters to the editor, 110
past award winners, 32
past president's message, 425
president's message, 1, 93
presidential address, 516
73rd annual meeting report, 518

Laboratory Methods
evaluation of precision of control samples, 332

Listeria and Listeriosis
behavior in Cheddar cheese, 463
behavior in milk and cheese, 464
controlling *listeria* hysteria in your plant, 555
ELISA detection in raw milk, 462
FA procedure for detection in dairy products, 463
fate in Camembert cheese, 463
growth patterns in dairy products, 462
in the United States, 463
methods for detecting in cheese, 464
raw milk analysis for, 461
surveillance of cheese for, 462
survival in ground beef, 462
thermal resistance characteristics, 464

Management
managing through a crisis successfully, 428

Meat Products
pesticide residues, 234
safety issues, 186

Milk Products
cholesterol and cholesterol oxides, 464
increasing the calcium:sodium ratio in cottage cheese, 465
lactose intolerance and fermented dairy foods, 467
microbial quality of raw, 467
microwave processing on quality, 468
quality of goats' milk, 468
total solids composition of regular homogenized, 465

Milk Regulation
dairy plant inspection by USDA, 468
FDA's dairy program initiatives, 184, 467
milk industry concerns, 232
NCIMS informational statements, 376
preliminary incubation count study, 467
vitamin additions to milk - are they there?, 468

Milk Testing
antibiotics in, 48
contamination with antibiotics detected by an immunoassay method, 465
detecting antibiotics by a rapid test strip assay, 465
detection of gram negative bacteria in cottage cheese, 468
evaluation of raw milk components, 430
growth of lactic acid bacteria in lactase-treated skim milk, 466
predicting shelf-life of fluid milk, 468
S. aureus in creams, 466
UHT milk to monitor calibration of infrared testing equipment, 466
use of temperature sensitive gel for concentration of bacteria, 467

Molds and Mycotoxins
A. parasiticus growth in a medium with KCl or KCl and NaCl, 469
control of and indoor air quality, 470
in Binagol, 469
quantitation of growth on cheese, 470

Pest Management
in food products, 4

Public Health Concerns
of fermented milk products, 10

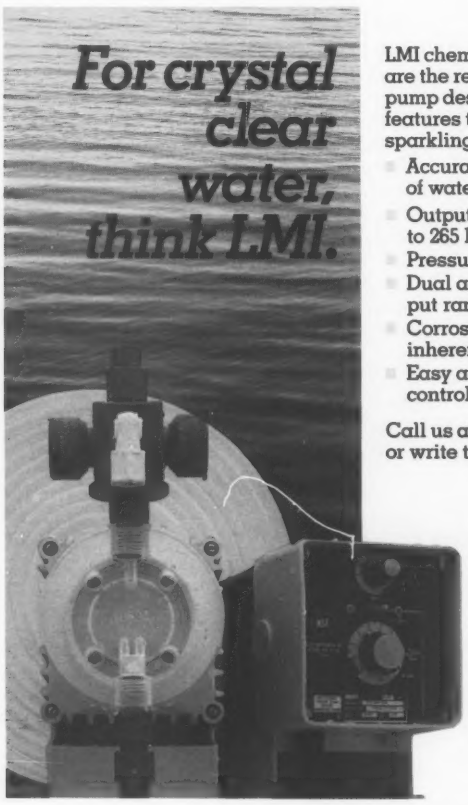
Salmonella and Salmonellosis
Illinois milkborne outbreak, 472
in Cheddar cheese, 472
in cooked beef, 328
QC of *S. typhimurium* in the shrimp industry, 471
rapid test for detection in foods, 472
recent developments for isolation and identification, 472
the problem, 472

Seafood
poisoning, 473
quality and safety of, 473

UHT Milk
measuring freshness, 285

Waste Treatment
groundwater contamination - the Rosemount story, 473
technology and direction of the hazardous waste industry, 473

3-A
standards, 224, 226, 269, 272
symbol holders list, 83, 415
the 3-A story, 96



LMI chemical metering pumps are the result of three decades of pump design expertise, and offer features that will keep your water sparkling:

- Accurate and efficient feeding of water treatment chemicals
- Outputs of .0058 to 70 GPH (.022 to 265 LPH)
- Pressures to 300 PSI (20.7 Bar)
- Dual adjustability for 200:1 output range
- Corrosion proof housings and inherent pressure relief
- Easy adaptability to automatic control

Call us about your requirements or write today.

LIQUID METRONICS INC.

19 Craig Road
Acton, MA 01720-5495 U.S.A.
Telephone: (617) 263-9800
Telex: 95-1781

When you treat your water with LMI... the results are crystal clear.
